Sydney, New South Wales, Australia berkaysenler229@gmail.com +61434015434 in/berkaysenler berkaissu.com

SUMMARY

IT administrator with a strong foundation in networking, systems, and customer support. Experienced in troubleshooting, supporting user-facing systems, and working with cloud-based environments.Worked with React, TypeScript, Python, PHP, SQL, and cloud services, and currently building strong foundations in machine learning and Azure AI.Values clean architecture, continuous learning, and reliable, well-structured systems.

EDUCATION

Bachelor of Information Technology

Minor in Network Management • Victoria University • 2025

Bachelor of Computer Engineering

University of Yalova • 2022

CERTIFICATIONS

Microsoft Azure AI Fundamentals (AI-900)

Microsoft • 2025

- Actively studying for Microsoft Azure AI Fundamentals (AI-900), with hands-on learning in machine learning concepts, Azure AI services, and responsible AI.

SKILLS

IT Support & Systems:

- Microsoft 365 (user support, account access, basic troubleshooting)
- Remote support & screen sharing (TeamViewer, Discord screen share)
- Ticketing systems (incident tracking, issue prioritization)
- Learning Management Systems: Moodle
- PC & OS troubleshooting (Windows basics, hardware/software issues)
- End-user support & customer service mindset

Networking:

- Basic networking concepts (TCP/IP, DNS, DHCP)
- Router, switch, access point, firewall fundamentals
- Ethernet cabling and network troubleshooting (academic labs)

Communication & Soft Skills:

- Friendly and approachable communication style
- Able to support users with different levels of IT knowledge
- Clear explanation of technical issues to non-technical users
- Calm and structured problem-solving approach

Software Development: JavaScript, TypeScript, React, Next.js, Redux, HTML5, CSS3, Tailwind CSS |
Built responsive web applications, implemented state management with Redux, and developed reusable UI components.

Data & AI: Python (Fundamentals), Machine Learning Fundamentals, Data Analysis Basics, Azure AI Fundamentals (in progress) |
Performed data analysis, built simple ML models, and explored AI solutions on Azure.

Databases & Cloud: SQL, PostgreSQL, AWS Amplify |
Designed and queried relational databases, integrated cloud services for web apps.

Tools & Practices: Git, GitHub, REST APIs, Agile Methodologies, Problem Solving |
Collaborated on version control, consumed and built APIs, and contributed in Agile sprints to solve technical challenges.

PROJECTS

Victoria University AI Student Assistant

Victoria University • vu-ai-assistant.vercel.app

- A full-stack web application providing 24/7 AI-powered student support for Victoria University. Built with Next.js 15, React 19, and TypeScript, featuring secure JWT authentication, real-time chat interface integrated with OpenAI GPT-3.5, and PostgreSQL database with Prisma ORM. Implements user session management, multi-chat history, message search functionality, and an intelligent fallback knowledge base system for enhanced reliability.

Kai.gg - League of Legends Analytics Platform

github.com/berkaysenler/lol-player-summary

- Developed full-stack web application for tracking League of Legends player statistics, match history, and ranked performance across all global regions
- Implemented three-tier caching architecture (Redis → PostgreSQL → Riot API) reducing API calls by 70% and improving response times
- Integrated OpenAI API for AI-powered match analysis providing personalized gameplay coaching and performance insights
- Built responsive UI with React/Next.js and Tailwind CSS, ensuring seamless experience across mobile, tablet, and desktop devices
- Designed RESTful API with Express.js and TypeScript, managing user authentication (Supabase Auth) and favorites system
- Technologies: Next.js, TypeScript, Node.js, Express, PostgreSQL, Redis, OpenAI API, Riot Games API, Tailwind CSS
